WORK EXPERIENCE

None

EDUCATION

Women Institute of Technology and Innovation, Kampala— Diploma

MAY 2022 - MAY 2024

I studied as a student in computer science with courses like web development, machine learning, database management and graphics design as well.

PROJECTS

Food Delivery System — *Front and backend(React and Flask Python)*

A system that allows users to order for food and can have their own dashboard. The data is saved in a SQL database.

Job Portal System — *Java (Command line)*

A system where employers can post about vacancies and also engage with job seekers.

TODO LIST — *React*

A system that helps users to plan their day by noting down what they will be doing and can later check them off and delete them.
